You may choose any size, this example is set up as 48” W x 96” H.

PAGE SAFE AREA

The blue line marks the “safe area”. It is 1” inside the edge of your printed banner. Keep any wording or important parts of your artwork within this area to prevent it from being trimmed.

BLEED

The orange area is the bleed area. It overlaps the printed banner by at least 1/4” for one sided, and 1/2” for two sided banners. Your artwork should fill this area if you expect the printing to go all the way to the edge of your printed piece.

If you have artwork that bleeds to the edge of the printed banner, then make the page size large enough to include crop marks and bleed, if your software does not do this for you.
