

Two-Way Circular Gate

Folded: 5-3/4"W x 5-3/4"H

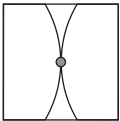

Unfolded: 11-1/2"W x 11-1/2"H

Mailing:

- **Self-mailer:** Non-machinable, tabbing required
- **In envelope or polybag:** Non-machinable. If mailed as a flat rate with a standard 6" square envelope, it is machinable and mails as auto rate.

Paper recommendation: 100# Text

Selfmailer Tab Locations:

Dieline: It is recommended that the dieline files be imported into a professional page layout application, with one page for the A-Exterior dieline file and another for the B-Interior. Smartpress accepts print-ready PDFs with full bleeds (see below).

Folding: Folding instructions are given below on the interior diagram. AIA is the first fold, BIB is the second, etc.

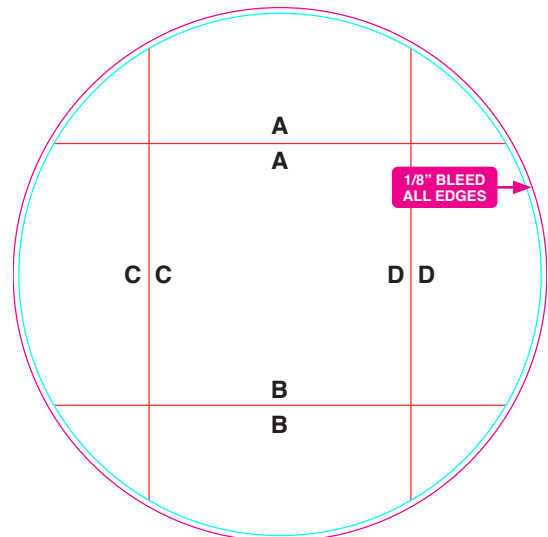

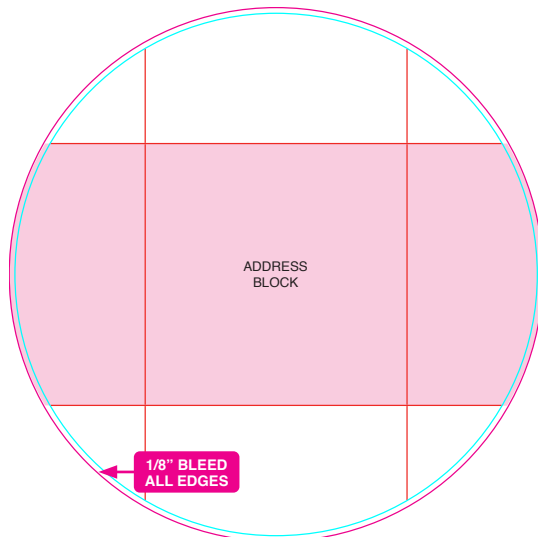

Bleeds: All backgrounds, images and other page elements that print to the edge of the piece must extend past the dieline by 1/8". These "bleeds" will be trimmed off during finishing. The diagrams below represent the finished edges as the blue line and the bleeds as the magenta line.

Customization: Altering the dieline in any way will result in additional charges. A quote for customizations, such as additional die cutting, may be requested at: <https://smartpress.com/pages/custom-quote>
